17 November 1978

MEMORANDUM FOR: Special Assistant, Office of Medical Services  
SUBJECT : Oxygen Regeneration Device

STAT

1. An employee in the Office of Imagery Analysis, NFAC has recently suggested acquisition of the device described in the attachment. OIA would appreciate the benefit of any expertise or advice that OMS could provide concerning such a device and its possible effects on health.

3. If OMS believes that no harmful effects can be anticipated, OIA will purchase one, or possibly two, of the devices for trial use.

4. Please call me on extension  if you have any questions or if I can provide addition information.

The new Energair ionized oxygen generator will make a handsome addition to any desk.

# Miracle Fuzz

*A new space-age invention and the same effect as lightening combine to create the world's first home oxygen regeneration system.*

Although it has no moving parts, you can actually feel a wind produced from the fuzz. This wind is ionized oxygen which spreads to fill a 1500 cubic foot room or about 15 feet square.

## EFFECTS FELT QUICKLY

You will feel the effects immediately. The Energair will clean your room of odor-causing bacteria and stale, musty or smoky air. Energair will keep you alert. With a fresh supply of ionized oxygen, you will have more energy, be less fatigued, and you will sleep better.

Our polluted cities often deprive us of enough oxygen to make us feel healthy and alert. The Energair solves this important problem by providing a personal environment—an area that surrounds your body and work location with fresh ionized oxygen.

## NEW SCIENCE

The oxygen ion generator is a relatively new product, yet its use in the home may make it more important than any filter system.

The Energair is a new breakthrough. Ionized oxygen generators have been under development since the early 60's. The Energair, using the latest in microelectronics, is the first cost-efficient system that produces over 100 times the ion production of other commercial units that cost ten times the cost of the Energair.

## USED IN HOSPITALS

Ionized oxygen creates a germ-free environment—proven through research at several universities. Hospitals are now converting many of their operating rooms to ionized oxygen. Among the hospitals in California are Eden Hospital in Castro Valley, Chico Memorial Hospital in Chico, and the Valley Medical Hospital in Fresno.

## TRY THIS DRAMATIC TEST

To show the dramatic effect of ionized oxygen, take the ion generator, blow cigarette smoke into a clear bowl, and hold the bowl inverted over the system. The smoke will vanish. The charged oxygen particles appear to dissolve the smoke particles, precipitating them from the air.

In a room, Energair surrounds you with these oxygen ions and cleans and purifies the air so even in a smoke-filled room, you will be breathing clean, country-fresh air all day long.

## DRAMATIC LIFE CHANGES

Working in an ionized oxygen environment, you will find your brain functions better. In actual brain wave tests, there was an increase in alpha waves

when ionized oxygen was used, indicating greater alertness, deeper relaxation, stress, and more creative brain function.

We are so impressed with the pleasurable effect of Energair that we urge you to personally test it yourself in your home or office.

Order one at no obligation. Put it by your desk, in your bedroom, or in any room where you spend a great deal of time. See if it keeps you alert, feeling better, and more productive. See how it rids your room of unpleasant odors and freshens the air.

## SLEEP EASIER

At home, use the Energair to control odor-causing bacteria. Use it by your bed and how fresh, country-like air makes you sleep easier, deeper, and more relaxed.

You should notice the difference within a day—especially in a work environment. Use it for a full month. Then, if you do not feel better and totally convinced of the positive effects of ionized oxygen, return your unit for a prompt and courteous refund.

The Energair is manufactured by the Foundation, one of America's leading research laboratories, and JS&A is America's largest single source of space-age products.

Service should never be required, but if there's a prompt service-by-mail center close as your mailbox—further assurance, your modest investment is well protected. Energair measures 9" high by 3" in diameter and weighs 24 ounces.

To order your Energair ionized oxygen generator, send \$69.95 plus \$3.00 for shipping and handling (Illinois residents, please add sales tax) to the address shown below or card buyers may call our toll-free number below.

Let space-age technology revitalize you with the world's first home ionized oxygen generator. Order one at no obligation.

You need oxygen to live. You can live without food for 60 days, without water for seven days, but without oxygen, you won't make it for two minutes.

Just a small piece of fuzz located on top of the cylinder shown above emits ionized oxygen.

You are already familiar with ionized oxygen if you've smelled the air after a thunderstorm. You feel great, revitalized and alert. The lightning from the storm adds a small negatively-charged electron to each oxygen molecule in a process called ionization.

## POSITIVE ADVANTAGES

Ionized oxygen performs several positive functions. First, it cleanses the air by attaching itself to anything floating in the air, causing it to fall to the ground.

Secondly, when inhaled, it has the same effect on the body as pure oxygen. It is absorbed quickly by the lungs and goes into the bloodstream making you feel more alert and alive.

The new space-age product shown above is an oxygen ion generator. The copper mesh fuzz on top of the unit is one of the secrets of the invention.
